# seratone®

## CREATIVE VERTICAL SOLUTIONS

Seratone panels are pre-finished wall panels manufactured on a lightweight, high density fibreboard. Seratone's versatile range of vertical solutions sets the tone for inspiring and creative designs of modern interior living and work spaces – it allows functionality and aesthetics to go hand in hand from homes to corporate and medical settings.

## PERFORMANCE IN THE WET

A “wet” area is any room supplied with water. For example: bathrooms, ensuites, toilets, kitchens, shower rooms, laundries, and changing rooms. Seratone Life and Seratone Escape are water resistant surfaces that are safe in all areas directly exposed to steam or moisture.

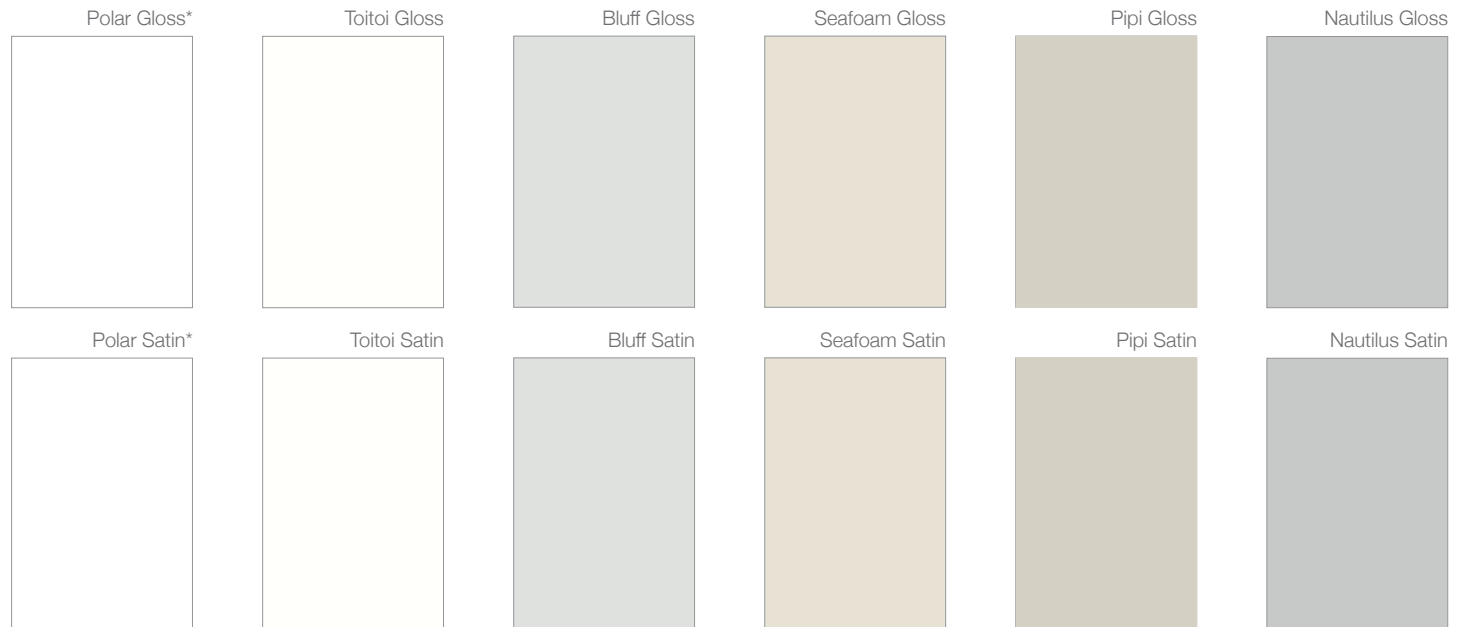

Seratone Life and Seratone Escape surfaces are easy to clean, impervious to moisture and will not support mould growth. This makes them an ideal material for hospitals, restaurants, research facilities and all areas where hygiene is critical.

# seratone<sup>®</sup>life

Simplify life with clean, fresh lines.

Seratone<sup>®</sup> Life injects natural beauty into everyday spaces. Surfaces are kept clean and bright with reflective simplicity. The lasting beauty of the Life range is not just in the smooth surface, it's also in its lightweight, non-porous durable quality. The six Seratone Life decors are available in either Gloss or Satin finishes.

Sheet size: 2400x900mm & 2400x1200mm. \*Also available in 2700x1200mm sheet size

# seratone<sup>®</sup>escape

Escape the mundane.

Create your own colour story with a palette of stand out colours that breathe life into any modern living or working space.

Due to the printing process colours and finishes may vary slightly from the actual products. Please view a sample before your final selection.

Sheet size: 2700x1200mm

## UV coating technology

Seratone panels are produced using UV coating technology. Paint contains no volatile organic compounds and is fully cured using UV light. Panels possess a tough glass-like finish which is stain, steam and moisture resistant. The UV cured surface offers improved scratch and chemical resistance when compared to similar two pack paint systems.

## Antimicrobial protection

An antimicrobial silver additive in the UV clear coat protects all Seratone panels against microbial activity. This makes Seratone Life and Escape ideal for applications where hygiene is critical. The additive used in Seratone panels gives them long term and effective antimicrobial properties, reducing the overall level of harmful bacteria in the environment and the likelihood of cross contamination.

## seratone<sup>®</sup>space

### COMMERCIAL GRADE PEGBOARD

- Available in any colour from the Seratone range
- Suitable for dry areas only
- Colour matched aluminium jointers available
- Ideal for retail spaces, kitchens and storage
- Single and double peg options available
- Please contact Laminex New Zealand for minimum order quantities and lead times

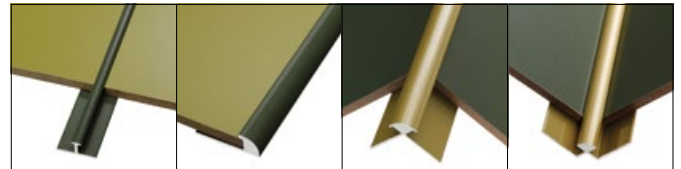

## seratone<sup>®</sup> jointers

Seratone surfaces free you to work creatively with texture, colour and light. Explore the design possibilities utilising Seratone's system of powder coated jointers to push the boundaries of your creativity.

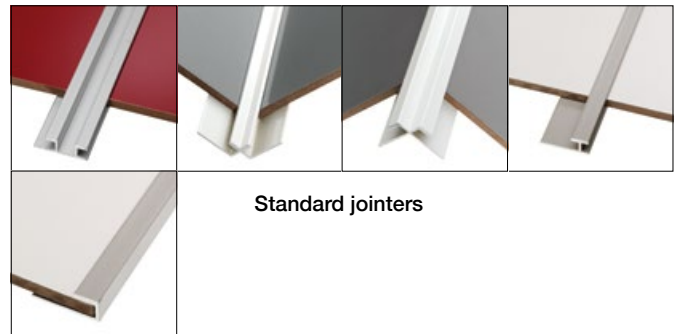

The only limit to its use on walls, ceilings, cupboards, sliding doors and partitions is your imagination.

- Anodised and colour matched aluminium jointing options
- Antimicrobial
- Frameless panels
- Mosaic or three dimensional effects (overlays and combinations with other finishes)
- Seratone in aluminium frames for sliding doors, office partitioning and furniture.

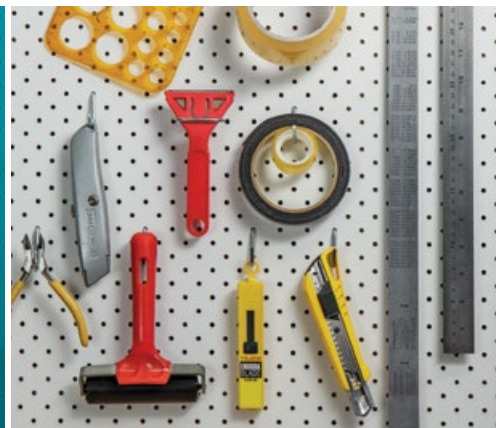

Design combinations of colour in any way you choose by mixing and matching from each of the colour ranges. The colour palettes have been specifically designed to complement each other.

Professional jointers (dry areas only)

Standard jointers
